RE: Radioactive Material Statement

To Our Valued Customers:

Amstek Metal LLC does not procure stainless steel from any firm identified to have radioactive material. We purchase stainless steel strip and wire products from both domestic and foreign integrated mills, many of which have implemented gate mounted detection systems to test for radioactivity on incoming scrap and raw materials. They also check for radioactivity on all semi-finished and finished products by suitable detection methods and approved devices.

If you have further questions, please do not hesitate to contact us.

Best regards,
