RE: REACH (Registration, Evaluation, Authorization and restriction of Chemicals)

To Our Valued Customer:

Registration, Evaluation, Authorization and Restriction of Chemicals, or REACH, consists of legislative framework developed by the European Union EC 1907/2006 to manage the risks that chemicals may pose to human health and the environment. This framework requires industry to register chemicals used in their products with the European Chemicals Agency (ECHA).

Amstek Metal LLC is a multi-location service center, and does not melt materials sold to our customers. According to the regulation, the products that are supplied by Amstek Metal LLC are considered "articles" and therefore exempt from registration requirements. Our suppliers continue to assess and monitor the REACH requirements as they pertain to the products we sell. As of this date, our suppliers have determined that the products sold to Amstek Metal LLC do not contain any significant amounts of chemical compounds on the Candidate List of Substances of Very High concern (SVHC). Therefore, we have concluded that none of the listed substances on the SVHC Candidate list are knowingly added to the product or processes used to produce the parts supplied to our customers at a greater level than 0.1% / weight. These products are considered compliant with European Union SVHC regulations.

We will continue to work with our Suppliers to determine how the REACH requirements will impact our business.

If you have further questions, please do not hesitate to contact us.
